## Packing

By:	Doc. No./Rev. No.:	Date:
nfr	3.3.2. / 00	07.11.2006

### **In General**

Optimal packing is crucial for success or failure. Marking such as Fragile or Handle with Care is not self sufficient, but it is a good supplement.

Goods should be packed taking into account:

1. Type of goods (high value goods, goods in sales packing, goods unpacked for instance a new car.)
2. Way of shipment (air, sea, courier and / or road)
3. Legislation (foods, hazardous goods etc.)

In case of doubt please contact Fastlane ApS for our recommendations.

Please be informed Fastlane ApS do not accept responsibility for the recommendations we give as to packing. Our recommendations are base on the accumulated know-how we have generated and should purely be seen as and offer. At the end of the day it will always be the shippers responsibility to secure sufficient packing.
